THE BAINBRIDGE

Modified Custom Home

WESTCOAST
Design

Welcome

to our home

We built this home as part of our dream to live in a custom-built house, specifically created for us.

To find the ideal spot and layout, we combed the entire island.

My husband was eager to build a custom house, and the Bainbridge home package made this an easy process.

We wanted a home that was environmentally friendly, and capable of off-grid living, and the Bainbridge met all our needs.

After comparing our options to other custom home designs, we made some modifications to create the perfect dream home.

We particularly loved the west coast design, with its lofty ceilings and angular details.

We also desired a multi-generational home, so that we could care for my aging parents in the future.

The house is set up so that our living quarters are on one side, and our parents on the other side with guest rooms that have their own ensuite.

The center of the home would be shared.

We were able to shorten the construction process and include solar panels in our design because of the custom home package.

Personal

LIFESTYLE

Building our custom dream home allowed us to create a space that truly reflects our personal lifestyle.

"We fell in love with the Bainbridge custom home package".

We loved its' open concept, architectural features, and large windows that allow natural light and stunning views.

We are surrounded by serene beauty, feeling relaxed, rejuvenated, and at peace with the world.

We are able to experience this every day, right in our very own custom home.

Building our custom dream home allowed us to create a space that truly reflects our personal lifestyle.

Our modified Bainbridge custom home, has a warm, and inviting atmosphere.

It is the home of our dreams!

Eco-Friendly Cedar Home Living

Sustainable, environmentally friendly living is not only important for energy efficiency, but it's also a great plan to ensure you have power if you live off the grid.

BAINBRIDGE

Bainbridge Modern Design

The Bainbridge modern house plan has an open floor concept with floor to ceiling windows which allows natural light to brighten up your new cedar home.

Can be designed and built for multi-generational living.
